# User Manual

Solar motion sensor light

## Features

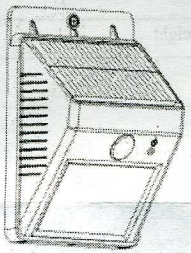
- Motion sensor automatically turns the light on/off
- Energy saving, low power LED light
- Built-in lithium battery rechargeable by solar power
- Up to 12 hours of working time with a single charge
- Sunlight sensitive, only works at night or in low light conditions
- Easy installation, no wiring required

## Packing Content

- 1 Motion Sensor Light
- 1 × Mounting Accessories kit (include 1 screw, 1 Sleeve and 1 pin key)
- 1 × User Manual

Thank you for purchasing Motion Sensor Wall Light. Please read this manual carefully to obtain best result from your purchase.

6LED



## Operation Instructions:

1. Unlock and activate the solar light

   The internal battery is locked from factory for safety shipment, so users have to use switch to turn on and unlock the battery and lighting system.

2. How to Install the device

   Please use the supplied screws to mount the device on pole or wall anywhere outside you want for lighting.

3. Charging via solar panel

   Please install the unit facing south and make sure the solar panel can get the good sunlight directly without any shelter or glass.

   Normally it can be fully charged in one day under bright sunlight.

4. Motion Sensor

   When people walk within 16ft, it will turn on bright light. When no motion, turns off after 40sec.

## Specification

| | |
